Re: State of Montana Air Quality Act of 1967

CONFIDENTIAL

The State of Montana recently passed its first air pollution law. As usual, this law gives enforcement and regulatory powers to the State Health Department.

Attached for your information is some material we have been able to obtain for you. This covers proposed ambient air quality standards, including a lead figure of one microgram per cubic meter of air averaged over 24-hours. This is not a public document and, according to the law, the material contained herein does not have to be made public until between 20 and 30 days before a scheduled public hearing.

We are following this situation with great interest and will welcome any comments and suggestions you may have.

Very truly yours,

Don G. Fowler
