Dr. M. Utidjian

N. Yin

Subject: BLOOD LEADS - CHICAGO PLANT

Reference:

We have two men with a six month blood lead average above 50 (both at 50.6).

We need advice as to how we approach OSHA in regard to their MRP regulation. We sure don't want to lose our STAR status and we can't afford to pay two men for performing make work jobs.

I will be working with Joe Caporossi and his people to implement the most effective programs.

A handwritten signature in cursive script, likely reading 'J. Gaffney'.

My compliments to Ed Mays for a job well done. Everyone should give Ed a pat on the back

BUT [REDACTED] should get their asses kicked. They might be the cause of the closing of this plant.

NO ONE - I repeat NO ONE should HAVE a Blood Lead above 45
