EDO & LAB SAFETY MEETING - JANUARY 1978

Present: Ted Gasser	Joe Doucette
Wayne Landry	Jay Butler
Floyd Campbell	Dan Neal
Art Bourg	Edgar Bishop
Larry Sam	John Lemoine
Huey Young	Ernest Garner
C. Arceneaux	Sharon Miller
John Rabalais	John Thibodeaux

Wayne Landry went over the safety record for the month of December, '77. He also covered the safety records of Dow personnel and Maintenance personnel for the year. The overall picture looks good.

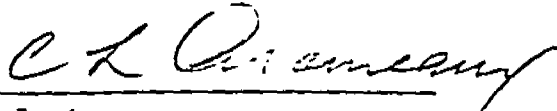

The Red Tag Master violation rate was over 10% for December. This is too high and we were encouraged to bring this down.

We were reminded not to use any fire fighting water connections for other than fighting fires. All connections on fire mains are not to be used unless for fighting fires.

Dan Neal went over the N₂ accident that happened in the Louisiana Division. Be very careful when working around or handling this gas. Remember that it displaces oxygen. Use proper safety procedures around any airtight buildings or vessels. Rescues should only be attempted with a supplied air mask.

We voted on the persons who should receive safety awards for the past year.

Took a test on the procedure for reporting spills. We went over the correct procedure afterward and everyone is expected to pass it 100% when it is given again later.
