post-op 186; is that correct, Doctor?

A That is correct.

Q That would have been approximately 12 and a half pounds of fluid that would have come off of him at that time?

A That is correct.

Q That is in addition to the 69 bottles that you and Dr. Cho removed; is that right?

A That is true.

Q Now, what kind of effect was all of this fluid having on Mr. Vandergucht's body and ability to function?

A Well, as I said before, difficulty in breathing, loss of appetite, difficulty in walking, having to sleep sitting up so he can breathe, loss of appetite, loss of weight, loss of solid body mass because he is not eating.

Even though his weight stayed reasonably consistent over this time, most of it or a lot of it was accumulation of fluid in the abdominal cavity.

Q Doctor, you can return to the witness
