April 4, 1941.

Dr. R. L. Jenkins
Director of Research
Phosphate Division
Monsanto Chemical Company
Anniston, Alabama.

Dear Dr. Jenkins:

This letter refers to yours of March 28. I have looked up the reference concerning the relative toxicity of the chlorinated diphenyls as described by Dr. Drinker and I find that the most recent reference which they discussed in a letter to me was not a publication of recent date, but was a publication in the Journal of Industrial Hygiene and Toxicology, Volume 21, No. 5 for May 1939. I am sure that you must have seen this article. When I talked to you I was under the impression that the article involved was a recent article published by Dr. Drinker.

Under separate cover we are sending you a copy of the complete specifications for the Pyranols which you manufacture. This is a duplicate of the book which we gave to Mr. Hosmer at Anniston.

Yours very truly,

fmc/mp

F. M. Clark.
