Subject R & D Safety Program, Hazardous Materials

Enclosed is a draft copy of a laboratory safety manual for asbestos, which was prepared at the request of the Niagara Falls Laboratory Chemical Safety Committee. Since the potential hazards of asbestos are both controversial and widely publicized, and its occupational use is regulated by OSHA it is extremely important that any manual be completely correct. Accordingly, this draft is now being reviewed by the Corporate Law and Medical Departments. I will provide you with the final version when it becomes available.
