Dear [REDACTED]

Please find attached an updated version of *B.4.1.3. Degradation of precursors into the corresponding PFAS arrowheads* that now also includes a subsection on side-chain fluorinated aromatics, as agreed. The updates have been added with track changes on.

Please don't hesitate if you have any questions.

Best regards,
[REDACTED]

Dear [REDACTED]

Thank you very much for this! We will now in the coming days review/integrate it to our working version.

BR,
[REDACTED]

Dear [REDACTED]

I hope everything is OK with you.

Please find attached *B.4.1.3. Degradation of precursors into the corresponding PFAS arrowheads*, which is a subsection in *B.4.1. Degradation* in the PFAS restriction dossier. It should be placed between the *B.4.1.2 PFAS subgroups* and the *B.4.1.4 Persistence of PFASs under regulatory and scientific scrutiny* subsections. There is a part on Side-chain fluorinated aromatics that is not yet done. It will be sent separately in the end of this week. I hope that is OK.

This is a 80-90% version that we will develop a bit further in the broad restriction, but still we think this version should be good enough at its current state. The subsection *B.4.1.3.* has been done in close collaboration with [REDACTED] and with contributions from NL. The references to subsection *B.4.1.3.* have been added to the reference list that were already in the *B.4.1. Degradation* section.

Best regards,

[REDACTED]
