Subject: RE: Heavy Metal Analytical Data from the Smurfit Stone Mill Site

Commissioner Strohmaier: The EPA team is reviewing the data and we will have a summary to you by June 14, 2018 or sooner. EPA will meet with the PRPs next week for discussions on completion the final Contingency Plan for the Smurfit-Stone Site. We are working toward getting a draft final to stakeholders for review and comment by the mid to end of July timeframe. The PRPs will continue to function under the Interim Contingency Plan until the final plan is complete. The EPA and DEQ representatives will be at the Smurfit-Stone CAG meeting tonight at Frenchtown. If you have other questions or concerns, please contact me at [Ex. 6] Thank you. Sara Sparks Remedial Project Manager
Environmental Protection Agency

Thanks for the update, Sara. Do you have an ETA on the completion of EPA analysis of the data? Similarly, any proposed date for the completion of the contingency plan (as opposed to the interim plan that was just completed)?

Dave

Subject: Heavy Metal Analytical Data from the Smurfit Stone Mill Site

Mr. Ross and Esteemed Commissioners: EPA would like to share the heavy metal analytical data collected from the Smurfit Stone Mill Site on May 23, 2018. The Potential Responsible Parties (PRPs) collected surface water samples in ponds adjacent to the river, in a ground water well located between the ponds and the river, and along the river. EPA is reviewing the data at this time. If you have questions or concerns, please call me at Ex. 6 Sincerely, Sara Sparks Remedial Project Manager
