RE: ASBESTOS

In a meeting this morning on a variety of environmental issues, the subject of asbestos was discussed.

We didn't have the knowledge in the meeting, but there were strong feelings that we need to deal more aggressively with eliminating asbestos.

Will you please insure yourself that:

1. The plants are aware of their asbestos situation.
2. We are not in violation of any regulation.
3. We are doing the right thing. 1989 is a good year to put problems behind us.
4. You are satisfied with our position.

I would like your feedback.

C. F. FETTEROLF
