F.Y.I. -- Attached is the early press pickup of our PCB release. I've also attached a copy of the Business Week story which is "on the street" in New York this morning.

A comparison of the rather thorough and favorable treatment we received in The Wall Street Journal and the St. Louis Globe-Democrat (as a result of sending out a news release) versus the hatchet job that Business Week did on us (as a result of waiting for them to do a story and then being forced to respond to specific questions) is a good case for taking the offensive.
