

Interoffice Communication

To R. E. Lehmkuhl - Houston
From J. A. DeBernardi
Date September 7, 1979
Subject Bayou Project Linear Program Engineer

With reference to your letter on the subject requesting candidate nominations from the VCM Plant, we do not wish to nominate anyone for this position. Our Process Engineering staff's plant experience level, with the exception of our Senior Engineer and Chief Engineer, is only 16 months or less. Although our young engineers are exposed to energy and material balance work, we do not believe their experience level at this point is adequate to undertake the Bayou Project Coordinator position.
