Subject: C8 Follow-up Medical Surveillance

Just wanted to let everyone know that we plan to do the follow-up medical surveillance for the people who participated in the baseline study last year. Beginning next week, we will be asking each unit to schedule their people for an appointment in Medical on Wednesday, Thursday or Friday by calling Les Bacon. Note that Medical is not yet fully functional as a result of their relocation and that this note is relative only to C8 follow-up surveillance. Forty three people participated in the baseline surveillance which included:

- medical history questionnaire
- automated chemistry profile (analysis by LabCorps) - SMA-12 (includes HDL, cholesterol, glucose, uric acid, BUN, calcium, phosphorus, total protein, albumin, bilirubin, alkaline phosphatase, LDH, AST (SGOT), total cholesterol, creatinine and ALT (SGPT))
- complete blood count (analysis by LabCorps)
- perfluorooctanoic acid (PFOA) in blood (analysis by National Medical Services, Willow Grove, PA)
- total fluorine in blood (analysis by Chris Bowers' lab in Jackson Lab)

The follow-up surveillance will be identical to the baseline surveillance and each person's results will be compared his/her baseline. I am also working with the unit S&OH coordinators to identify others who need the baseline surveillance - these people are not included in the following list. We plan to do the follow-up on all of the original participants, whether or not they worked in the process. A decision still needs to be made relative to the people who are no longer on the site. An email message will be sent to each participant on Monday with copies to their unit manager and S&OH coordinator informing them of the program. I will forward a copy of the draft letter in another message. I recommend that you talk to the employees before they receive the email so that they know it is coming.

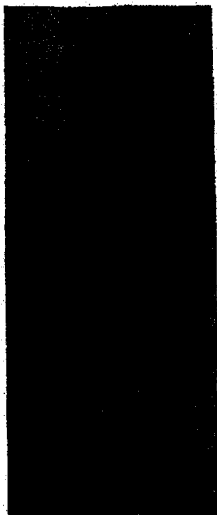

Workers in the surveillance will include:

Name	Shift	Area	Status
	A	JL Tech	
	A	JL Tech	
	A	Operator/1205	
	medicalMech/PPW		never worked in process
	A	Mech/PPW	
	A	Operator/1205	
	B	Operator/1205	
	B	Operator/1205	
	B	Mech/PPW	never worked in process
	B	JL Technician	
	B	JL Technician	
	B	Operator/1205	
	C	JL Technician	
	C	Mech/PPW	
	C	Mech/PPW	
	C	Operator/1205	
	C	JL Technician	
	C	Operator/1205	

REDACTED

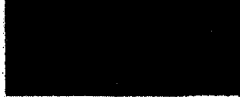

Company Sanitized. Does not contain TSCA CBI

000221

D	JL Technician	
D	Operator/1205	
D	JL Technician	
D	Operator/1205	
Day	Engineer/1205	never worked in process
Day (12)	JL Technician	now in [redacted] J24
Day	Elec/PPW	
Day	Mech/PPW	
Day	JL Technician	
Day	JL Technician	now in K37
Day	Mech/PPW	
Day	FLS/PPW	
Day	Mech/PPW	never worked in process
Day	JL Technician	
Day	Mech/PPW	
Day	JL Chemist	
Day	Engineer/PPW	
Day	JL Chemist	
Day	JL Technician	

People no longer on the site:

Operator/1205	retired
Mech/PPW	retired
JL Chemist	transferred
JL Technician	pensioned

Prior to their visit, everyone should receive a copy of the medical history interval form and bring the completed form with them when they come to Medical. I will give copies to John Plum for the PPW workers and to Aaron Chen for the JL workers.
