

FILE NAME: Owens-Corning (OC)

DATE: 1972 Mar 21

DOC#: OC044

DOCUMENT DESCRIPTION: Memo RE NICA Safety and Health Booklet with Retyped Copy

intra-company correspondence

to D. Bradshaw - San Francisco

from John Vyverberg - New York

date March 21, 1972

subject NICA SAFETY & HEALTH BOOKLET

cc: D. C. Glosser - Toledo/23
J. P. Kern - Toledo/23
Dr. J. L. Kouzes - Toledo/11
L. W. Saxby - Toledo/23
C. Sheckler - J-M

You asked for comments on your draft of above.

I compliment you on all the work you have done on this practical working guide on basic safety and health practices.

My only suggestion relates to your statements on asbestos dusts and respirators.

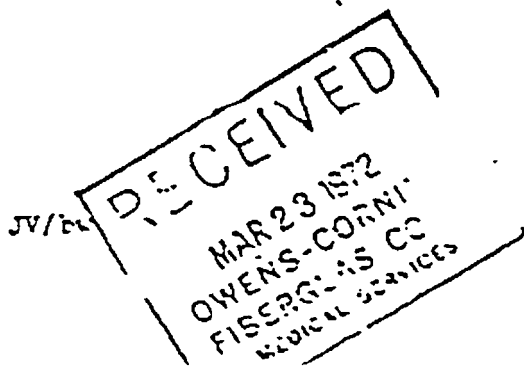

As you know, the Labor Department, OSHA, has issued proposed standards re asbestos and final standards will be issued in near future.

I suggest that your statements on asbestos relate to the Federal Standard -- otherwise your guideline would be more restrictive. As an example you state -- "you should always wear an approved respirator for asbestos dust --." Why say "always" if not required in national standard?

One other small point is that on page 2, next to last paragraph, I would suggest elimination of the words "or whenever dusts cause irritation." Are you talking about skin irritation or otherwise?

Again, I compliment you on your fine work, and I am sure that Cliff Sheckler will give you additional detailed comments as Chairman of the NICA Health and Safety Committee.
