

IN THE ALBION November 1992

IN THE ALBION November 1992

INDUSTRIAL HYGIENE FEATURES

The evaluation of drugs in industry is discussed in Abst. No. 413.

See Abst. No. 418 for details on measuring blood cholinesterase.

Abst. No. 419 investigates environment and gastrointestinal disease.

Abst. No. 421 is concerned with the early detection of cancer among low-income groups.

Abst. No. 425 reports on neurodermatoses in industry.

A test for hypersusceptibility to hemolytic chemicals is described in Abst. No. 432.

Fluoride exposure and worker health is the topic of Abst. No. 435.

Six fatalities of acute salt poisoning in infants is reported on in Abst. No. 436.

Data on the absorption and excretion of mercury in man are presented in Abst. No. 442.

See Abst. No. 447 on health hazards of the pesticides endrin and dieldrin.

Abst. No. 450 gives information on the suppression of dust in a fertilizer plant.

Measuring the resistivity of power station flue dust is described in Abst. No. 452.

Information on byssinosis in a cotton weaving mill is given in Abst. No. 457.

An interim report of 11 cases of acute accidental superficial x-ray burns is given in Abst. No. 475.

Consult Abst. No. 482 for experiments on the measurement of diesel engine emissions.

See Abst. No. 490 for disability absences of workers after heart attacks.

Some aspects of human behavior in relation to accident morbidity are reported on in Abst. No. 491.

FOUNDATION FACTS

NEW MEMBERS. The Foundation is very pleased to announce two new member companies:

Comalco Aluminium (Bell Bay) Limited
Marbon Chemical Division, Borg-Warner Corporation

DR. H. H. SCHRENK, former managing director of Industrial Hygiene Foundation, has been named research consultant to the president of Mine Safety Appliances Company. He succeeds the late Dr. William P. Yant.

INDUSTRIAL HYGIENE FOUNDATION was represented at the American Industrial Hygiene Conference in Cincinnati, May 6-10, by Dr. Robert T. P. deTreville, Managing Director, William J. Schreibels, Industrial Hygiene Engineer, and James M. McNerney, Toxicologist. Mr. McNerney is a member of the A. I. H. A. Hygienic Guides Committee.

NEW REPRINT available from the Foundation upon request: "Pulmonary Clearance: Its Mechanism and Its Relation to Pulmonary Disease", by Paul Gross and Theodore Hatch. J. Occ. Med. 5, 191-194 (April 1963).
