Dr. Robert A. Kehoe
University of Cincinnati
Department of Preventive Medicine
and Industrial Health
Cincinnati 19, Ohio

Dear Dr. Kehoe:

It was very kind of you indeed to look up the statistics on lead poisoning. It casts a very new light on it as far as I am concerned and I intend to look into the matter more carefully.

Thank you very much for your consideration.

With kind regards, I am,

Yours sincerely,

A. Ver Brugghen

you in this connection, but I cite the references on the attached sheet. I have induced the people at the Children's and the Cincinnati General hospitals to begin to get their data together so as to publish a series of articles on their cases. This, I hope, will be done in the near future. Meanwhile I can give you the figures which Sam Trufant gave me a few days ago, which bear on the matter which we touched on in Chicago. These also are listed in tabular form on the attached sheet. I can also say that the group here is of the opinion, tentatively, that the use of disodium calcium
