You're absolutely right. I have teed up the group to answer how they feel about these questions. Just wanted to give you a heads up.

Preston Beard

Director of Policy, Global Energy Institute

Preston,
My understanding was this was a listening session for EPA to hear from the Chamber and that EPA would not be sharing information.
Regards
Lynn

I wanted to pass along some initial thoughts on the conversations

1. Implementation and Compliance of Recent HON and TSCA Rules

- How does EPA plan to implement recent HON and TSCA rules, and are any modifications anticipated?
- Given lead times and compliance costs, how should industry navigate uncertainties in requirements and timeframes?

2. TSCA Risk Evaluation Framework Rule & Stakeholder Engagement

- Will the court grant EPA's voluntary remand of the Risk Evaluation Framework Rule before the March 21 oral argument deadline?
- What is the timing for withdrawing and reproposing the rule?
- Will EPA engage stakeholders in discussions about potential changes?
- What aspects of the framework rule and ongoing risk evaluations are being prioritized for change?

3. TSCA Section 5: Addressing the Backlog & New Chemicals Review

- How does EPA plan to address the backlog of new chemical submissions while supporting the administration's goal of domestic manufacturing?
- What steps will EPA take to improve predictability in the new chemical approval process?
- How will Consent Orders and Significant New Use Rules (SNURs) be handled?
- Can we expect an increase in non-5(e) SNURs or a reduction in time between signed Consent Orders and published SNURs?
- Is EPA considering re-writing the newly finalized New Chemicals Rule?

4. PFAS Framework & Guidance

- Will EPA consider removing the PFAS framework?
- If not, will EPA provide specific guidance on key framework elements, such as defining 'negligible' exposure?

5. Risk Evaluations & Management Rules

- Will there be changes to pending or recently finalized risk evaluations?
- Should we expect modifications to final risk management rules, or will EPA focus on future evaluations?

6. Exposure Assessments: Worker, Air, and Water Risks

- What is EPA's approach to evaluating worker exposures? Will it continue setting ECELs or other exposure levels?
- How will EPA address air and water exposures under TSCA?
- Will EPA revert to the previous policy of leaving air and water assessments to other EPA offices?
