Subject: [EXTERNAL] Invitation to schedule meeting with the American Coal Council May 7 -8 , 2025

The American Coal Council (ACC) would like the opportunity to schedule a meeting with the Department of Energy, Secretary Wright on May 7th or 8th , 2025, to discuss critical issues affecting the coal industry.

The ACC represents the interests of the American coal industry supply chain, including coal producers, consumers, transportation companies and support service firms.

As the nation progresses under President Trump's second term, the coal industry is excited for the many opportunities ahead of us to strengthen our industry for decades to come. With supportive policies, technological advancements, the rebuilding of manufacturing and infrastructure, and a commitment to energy independence, coal will continue to be a vital component of the nation's energy strategy.

We look forward to scheduling a meeting with the Administrator and discussing these important topics and exploring ways to ensure the continued success and stability of the coal industry.
