I will look into it.

Thanks,
Scott

Scott,

I have a big problem related to the North American Invasive Species Forum in May in Savannah and I thought I would reach out to you in your new position and see if you could help. The goal of the meeting is to look at policy and areas of cooperation across the U.S., Canada and Mexico, and with the travel ban at DOI, Jamie Reaser (or other NISC staff) are unable to attend. This is going to greatly reduce the usefulness of the Forum. We are paying for the Mexican principals to come but the U.S. but the U.S. principals would have to present remotely.

Is there anything that can be done or someone else I can reach out to? We have been planning this Forum for 2 years and it is historically only in the U.S. every 6 years.

Thanks,
Chuck
