

Section VI — Health Hazard Data

Trade Name: Airflex

Acute Toxicity Effects

See Chronic Toxicity Effects.

Chronic Toxicity Effects

Irritates or damages the pulmonary tissue; asbestosis, suspect carcinogen as defined in 29CFR1910-1200.

Symptoms: Cough, tightness in chest, shortness of breath.

Threshold Limit Value For Mixture

Airborne concentrations over (2) fibers (longer than 5 micrometers) per CC of air measured in accordance with 29CFR1910.1001. As shipped, asbestos fibers are encapsulated by bonding agent and should not be released into the air.

Emergency and First Aid Procedures

No special procedures. - Contact Medical Personnel

Section VII — Reactivity Data

Unstable

Conditions to Avoid

Will Not Occur

Section VIII — Spill or Leak Procedures

Steps to be taken in case material is released or spilled, including disposal method

No special precautions - solid material.

Section IX — Special Protection Information

Respiratory Protection (Specify type)

See below

Protective Gloves (Specify type)

N/A

Other Protective Equipment

N/A

Ventilation

Local Exhaust

Special

Mechanical (General)

"Adequate local exhaust ventilation and dust collection may be required during secondary processing to meet OSHA permissible exposure limits. Respirators are advised for workers at all times."

Section X — Special Precautions

Precautions to be taken in handling and storing "Proper work practices where asbestos dust might be created should be followed such as, where appropriate, wet handling to reduce airborne fibers and proper housekeeping to avoid accumulations of asbestos fibers. In disposing of waste care should be taken to avoid generating airborne asbestos fibers and all waste which foreseeably might generate airborne concentrations in excess of OSHA permissible exposure limits should be collected and disposed of in impermeable bags or other impermeable containers."

Respondent's Printed Name

James W. Fisher
