RESOLVED, that all foreign licenses and agreements involving the use of this Company's trade marks, trade names, and label designs outside of the United States by parties with whom this Company and/or its wholly-owned subsidiary, Glidden International, C. A. has entered into foreign technological assistance contracts shall be approved by the Foreign Trade Mark Committee prior to execution, and

FURTHER RESOLVED, that, provided the execution of such foreign technological assistance contracts by Glidden International, C. A. has been approved by this Company, no further approval of any such foreign licenses or agreements by the Board of Directors of this Company or by this Executive Committee shall be required, except where any such foreign license or agreement shall extend beyond the term of the technological assistance contract under which it has been granted or where such a license or agreement shall, in the opinion of the Foreign Trade Mark Committee, involve a question of basic foreign trade mark policy.

Mr. Paul H. Heidhardt presented the following Paint Division advertising budget for the 1957 fiscal year

Trade Sales National	\$1,102,000
Other National	\$50,000
Local	<u>1,745,000</u>
	\$3,097,000

Comparisons were made between the foregoing budget and the 1956 budget which totaled \$2,871,413. Total advertising expenditures under the current budget projected through August 31, 1956 were estimated by Mr. Heidhardt to be \$2,752,537.

The Chairman asked that added emphasis be given house paint promotion in Fall and Spring advertising for the purpose of improving the Company's competitive position in this field. Both the Chairman and Mr. Heidhardt urged that this advertising graphically portray economic

advantages afforded the "do-it-yourself" painter by using the Company's premium quality Endurance Imperial house paint. Following discussion of these suggestions and other matters pertaining to advertising policies, the budget presented by Mr. Heidhardt was, upon motion duly made and seconded, unanimously approved.

Mr. Paul E. Sprague, Vice President in charge of the Naval Stores Division, recommended and the Committee, upon motion duly made and seconded, unanimously approved granting Ishihara Sangyo Kaisha, Ltd. licenses under the Company's Japanese patents covering all titanium dioxide manufacturing processes disclosed to it in accordance with the parties' October 14, 1952 technological assistance contract approved by the Directors.

At the request of Mr. Harvey L. Slaughter, Vice President in charge of the Food Division, the Committee unanimously agreed to postpone until July, 1956 consideration of a comprehensive report to be prepared by the Food Division on its deep frying oil promotion program, which report had been originally scheduled for presentation to the Committee in May.

There being no further business to come before the Committee, the meeting was adjourned.
