Attention: Mary Dominiak (AR-226)

Subject: FFFC Member Confidential Information Submission

Chemguard Inc. began marketing AFFF type foam concentrates in [REDACTED] for the first time using our own fluorochemical surfactant named Chemguard FS-100. This product is only used internally by Chemguard and is manufactured at 40% solids in water at a toll producer.

The chemical structure is given below. The PMN for this product was submitted as confidential; the structure continues to be maintained as a secret.

[REDACTED]
[REDACTED]
[REDACTED]
FW [REDACTED]

Chemguard FS-100 has been used in all Chemguard AFFF agents since [REDACTED] except for Chemguard Military specification product which uses [REDACTED] produced fluorochemical surfactants

Respectfully Submitted,

Kirtland P. Clark
