

Dr. Kehoe

Dept. of Biochemistry

U. of Cincinnati

Dear Sir:

at the station to which I am reporting for duty in industrial hygiene, there is reported to be exposure of as high as 7 mg/cu. ft. of lead exposure for short periods of time. Dr. Flinn of Columbia U. suggested my writing you for information as to acute and chronic lead poisoning. Any information or references to literature will be appreciated.

My address for the next two weeks will be
1855 Sniller St., Little Rock, Ark.

Roland E. Byrd
