Press Made Attica Crimina

By BILL BOYARSKY
Globe-Democrat-Los Angeles Times News Services

ANAHEIM, CALIF. — Vice President Spiro T. Agnew told applauding police chiefs Monday that "the liberal press" has portrayed "criminals as heroes" in its coverage of the Attica prison revolt.

"We again find wide and relatively uncritical exposure being given the most inflammatory and baseless charges made by radical militants and their counsel—not to mention in this instance, convicted criminals," Agnew told the 78th annual convention of the International Chiefs of Police.

"HOW MANY murderers, robbers, burglars and rapists become known to the public by affectionate nicknames and the

Poison Found in Food Packaged In Recycled-Paper Containers

By Associated Press

WASHINGTON — The Food and Drug Administration said Monday it has found a persistent and poisonous chemical called PCBs in seven packaged food products, apparently as the result of contamination from containers made of recycled cardboard.

The agency said it found the DDT-like chemical in one sample of Sunshine shredded wheat at a level 45 times the federal action guideline. It said it found the chemical at levels up to four times the federal standard in shredded wheat, spaghetti dinner, cornmeal, mixed baby cereal, chili mixed dinner and pancake mix.

THE AGENCY has seized none of the products. It is making a survey of 15 grocery products for contamination.

PCBs were first discovered in the agency's "market basket survey" completed four months ago traced to the Sunshine enriched wheat and ultimately to the containers, which comprise up to 50 parts per million of the chemical. The brand names of the other products found to be contaminated were not available immediately.

PCBs already have forced the seizure or destruction of chickens, turkeys, eggs and catfish food this year. It has been blamed for an outbreak of liver and skin ailments in Japan and has caused a 100 per cent *mortality rate among* chicken embryos in laboratory tests.

Donald A. Berreth, press officer for the FDA, called the contamination level in food very, very low. He said the agency recently set a level—above which the agency would act—of five-tenths parts per million PCBs for eggs and five parts per million for poultry. Levels are set, he said, on a case-by-case basis.

THE FIGURES on PCB levels in the shredded wheat packages was contained in a letter to Rep. William F. Ryan (Dem.), New York, from M. J. Ryan, director of legislative services for FDA.

The letter said the 15-product survey started Sept. 1. The agency also has met with industry to discuss the problem, the letter added.

Monsanto Co. of St. Louis, the sole producer of the chemical, has ceased selling it for anything except closed systems where its use is primarily as a coolant.

environmental issue.")

Berreth said the contamination of recycled cardboard apparently comes from the carbonless copying paper, two uses which have ceased.

BERRETH SAID he knew of no way a consumer could tell containers made of virgin cardboard from containers made from recycled cardboard.

The items the agency is checking are: Crackers and bread crumbs; macaroni and noodles; pretzels and snack chips; breakfast cereals; cake, pancake and cookie mixes; dried milk and dried milk products; desert and pudding mixes; baby cereals; cookies; refrigerated unbaked products; rice, oatmeal and farina; chocolate and cocoa; cheese; dried fruits, and frozen fruit juices.

Monsanto Co. of St. Louis, the sole producer of the chemical, has ceased selling it for anything except closed systems, where its use is primarily as a coolant.

Six federal agencies announced the formation of a task force Sept. 8 for a coordinated investigation into PCB contamination of food and other products.

A Monsanto spokesman said in St. Louis Monday, "Monsanto believes the federal government's task force approach to the PCB environmental issue is most appropriate and the company stands ready to continue its support and cooperation with these agencies.

"At the same time we believe our three-year-old program to control the uses and the escape of PCB is correct and that it will supplement the agencies' efforts. We will continue to pursue our control program in the conviction that it will help solve this en-

[illegible] — [illegible] businessman [illegible] abducted a man [illegible] criminal division in what appeared to be a political kidnaping, authorities reported.

The kidnapers later telephoned the home of the victim, civil aviation director Julio Hirschfeld Almada, Sr., and demanded $240,000 in exchange for his life, police said. A spokesman for Hirschfeld's family said it was willing to pay the ransom.

Police said a witness to the kidnaping saw a taxi cut in front of Hirschfeld's car as he rode to work, and four men jumped out of the cab with submachine guns.

"THEY FORCED the chauffeur out of the car and then pulled Hirschfeld out of the back seat and pushed him into the taxi," the witness was quoted as saying.

Hours later, police said a vehicle, apparently the taxi, was found 15 blocks away from where Hirschfeld lives, in the Lomas de Chapultepec section.

Police said a woman's black wig was found inside the car. In an earlier report, officials had said one of the kidnapers was a woman.
