

March 13, 1969

Mr. Ken Brakebill, Manager
Inorganic Chemicals Division
Monsanto Company
800 North Lindbergh Boulevard
St. Louis, Missouri 63166

Dear Mr. Brakebill,

At the suggestion of Mr. Dan Yovich, of the J. W. Mortell Company/
Mankakee, Illinois, we are arranging to send you, by parcel post,
a five pound sample of our Grade RK composite asbestos.

This is in connection with the intumescent coatings, in which your
company and the Mortell Company are interested.

We believe Grade RK, which is somewhat shorter in fibre length,
may be more suitable in the formulation than Grade S33/65, particu-
larly in spray applications.

If larger samples are required please let us know.

Sincerely yours,

NORTH AMERICAN ASBESTOS CORPORATION

President
