

As Usual
US .22 N. R. A.'S
Top Them All.

S*IXTY per cent of the prize-winners in the 1925 U. S. R. A. .22 calibre outdoor championship matches used US .22 N. R. A. long-rifle cartridges. In other words, more places were won with US .22 N. R. A.'s than with all other makes combined.*

An unusually fine showing? Yes. But it happens regularly with US ammunition. In the Olympic and International matches in France, in the N. R. A. and Camp Perry matches last year and before, it was the same story--US topped them all.

Absolutely uniform and accurate, US ammunition has long been the choice of pistol and revolver shooters the world over. Try a box the next time you face the targets.
