DOCUMENT DESCRIPTION: Letter to Dr. Leroy Gardner, Saranac Lab RE Dr. Lynch

Dictated Dr. Lynch

Bridgeport, Conn.
May 23, 1938

Dr. Leroy U. Gardner, Director
The Saranac Laboratory for the Study of
Tuberculosis
7 Church Street
Saranac Lake, N. Y.

My dear Dr. Gardner: CONFIDENTIAL

Very glad to get your letter of May 19, in reference to Dr. Lynch.

I want to say I am pinning my faith to you, and am quite positive it will not be very long before you convince Dr. Lynch that your findings, whatever they may be, are correct.

I don't think Dr. Lynch had any particular experience, other than general medical practice, with dust problems until he became connected with our North Charleston plant, and he seemed to be about the only one in that vicinity that was willing to learn something about our dust problems. While he has some positive ideas, I believe that he will be subject to your proof, for I understand he has a great deal of confidence in Dr. Lanza and yourself.

Very truly yours,

SE:G
