Please note: The gross payroll year to date column recently added to the Workers' Compensation/Public Liability Report 5080 refers to the policy year July through July, and not the calendar year. Therefore, the quarter ending December should have included the figures from the quarter ending September and your figures for the December quarter. I have corrected your figures for the December quarter (see attached)
If you have any questions, please call me immediately. I am sorry for the confusion.
