DOCUMENT DESCRIPTION: Letter to Saranac Labs from Vandiver Brown

November 20, 1939.

Leroy U. Gardner, M. D.,
Director,
Saranac Laboratories,
Saranac Lake, N.Y.

Dear Dr. Gardner:

I was very sorry I missed greeting you and talking with you in Pittsburgh during the early part of last week, but it was necessary I catch a plane in order to return to New York Wednesday evening and I was therefore obliged to leave the second day's session before it terminated. However, I was there long enough to hear your very interesting report upon the experiments you have been conducting with funds provided by Air Hygiene Foundation.

My principal object in writing you at this time is to call your attention to the fact that the arrangement embodied in our exchange of letters dated November 20, 1936 and November 23, 1936, respectively, will soon expire. One further payment of \$1,250 will become due towards the end of the year, which will make a total of \$15,000 advanced during the past three years.

In view of this fact, you may desire within the near future either to provide us with a further Progress Report or a complete report and summation of the results thus far attained. If the report be final in character, I suggest it provide the answers, so far as possible, to the specific questions with which the survey was originally concerned, as well as any other matters of interest or importance observed by you during the course of your experiments.

00728

If you are of the opinion that further experiments should be conducted, either to complete the original program or to provide a solution to other important aspects of the problem, I believe it would be well for you to accompany your report with a letter containing your suggestions along these lines.

I am sending a copy of this letter to each member of the group of manufacturers who have been contributing to your experiments.

Sincerely,

Vandiver Brown,
General Attorney.
