

1 how to do asbestos sampling and how to do an analysis
2 of asbestos?

3 A Yes, sir.

4 Q Would you describe for us, please, what
5 their study showed.

6 A Sure. Now, these samples were taken for
7 relatively short periods of time, but they show that
8 when the person is blowing the dust out of the brake
9 drums, that at a distance between one and one and a
10 half meters, that is, between three and oh, say, seven
11 or eight feet --

12 Q A meter is just a few inches more than a
13 yard?

14 A Yes, sir.

15 Q Okay.

16 A -- that the peak fiber concentrations were
17 quite high, average was 15 fibers per milliliter or
18 fibers per cc. It is the same thing.

19 Q Milliliter is also the size of a sugar cube,
20 just another way of saying a cubic centimeter?

21 A Yes, sir, same thing.
