Dear Bob:

I have been in communication with Ms. J. Norris of Dow Chemical and I would like to have a meeting of the CMA Vinylidene Chloride Technical panel to be held in Washington, DC, CMA Headquarters, on July 16, 1985. The agenda for the meeting would include:

1. A status report on ramifications of the Dr. Maltoni Research results.
2. Reactivation of the Toxicology Subcommittee.
3. Monitoring and possible participation in any National Toxicology Program future bioassays.
4. Vinylidene chloride toxicology and health data voids.
5. Review of future research needs.
6. Federal and state regulatory activities.

Very truly yours,

Zeb G. Bell /pp
