1535 N. Madison Avenue
Bay City, Michigan 48706

Dear Mr. Diehl:

Monsanto's Mr. Bill Slowikowski has informed me of your inquiry relating to the presence of polychlorinated biphenyls (PCBs) in Pydraul 50E and Pydraul 312C.

Polychlorinated biphenyls (PCBs) are not used as ingredients in the formulation of these Pydrauls. In addition, no PCBs are present in the processing equipment used in their manufacture. In fact, except for electrical transformers and capacitors, there are no PCBs present in the plant in which these products are made.

To the best of our knowledge and belief there are no PCBs in Pydraul 50E and Pydraul 312C.

I hope this information is useful to you. If I can be of further service please let me know.

Sincerely,

W. B. Papageorge
Manager
Environmental Protection
