Gentlemen:

MSDS SECOND REQUEST

OSHA HAZARD COMMUNICATION STANDARD

On February 28, 1986 we sent you a letter requesting Material Safety Data Sheets; we have not received them. The recently enacted OSHA Hazard Communication Standard requires that we identify hazardous chemicals and receive a Material Safety Data Sheet (MSDS) for each chemical we receive from you at our Parma Technical Center.

Our records indicate that we have received from you each of the chemicals listed below. Please provide us with an MSDS for these chemicals and for any other chemical that your records show you are supplying to our plant.

Marinite
Transite

WE CANNOT USE THESE CHEMICALS IN THE FUTURE NOR CAN WE EVALUATE THEM FOR FUTURE PROCESSES IF WE DO NOT HAVE AN MSDS.

We would appreciate your prompt response to this request prior to November 7, 1986. Please advise me if you experience any difficulty in complying with this request.

Sincerely,

O. L. Blakslee
Manager of Purchasing
