DOCUMENT DESCRIPTION: Letter from the Threshold Limits Committee

March 24, 1964

Mr. F. H. Edwards
Personnel Administrator
Owens-Corning Fiberglas Corporation
Toledo 1, Ohio

Dear Mr. Edwards:

As Chairman of the Threshold Limits Committee of the American Conference of Governmental Industrial Hygienists, I wish to acknowledge receipt, in behalf of the Committee, of the Kettering Report on "Statement and Supporting Documents Concerning the Potential Occupational Hazard of Respiratory Exposure to Air-borne Fibrous Glass in Relation to the Threshold Limit Value."

Because of its extensive nature, the Committee felt it had insufficient time to examine its contents prior to its meeting on March 2, 3, and consequently would like to take more time to evaluate its contents. The Committee did note in passing, however, that the average air concentration for FIBROUS GLASS with few exceptions throughout the plant operations surveyed in the report was, 1.25 mg/m^3, a value within the tentative limit recommended by the Committee, of 2 mg/m^3.

The Committee will accede to the wishes of the Owens-Corning Fiberglas Corporation and remove from its Threshold Limits Listing of 1964 the term "Fiberglas" and regrets the unintended implication of singling out your corporation in regard to this listing, and earnestly hopes that this inadvertence did not result in any hardship or inconvenience to your corporation.

Sincerely yours,

In Behalf of the Committee
Herbert E. Stokinger, Ph.D.
Chairman, Threshold Limits
Committee

cc: Dr. Kehoe
