**Subject:** CityLab inquiry: generators, environmental impact

Hello,

I'm a journalist with [CityLab](#) and I'm writing a story for May about the environmental impact of generators at outdoor festivals, food truck gatherings, street fairs, etc. Would someone at EPA be available to talk about the relative environmental impact of diesel, propane, and solar generators? Hopefully they could venture a guess as to the impact of all these street festivals on the environment or at least recommend someone who could.

I'd appreciate any resources you have on the topic, but most of all I'm looking for a short phone conversation with someone with expertise in the area over the next two weeks.

Let me know, please, and thanks!

Chris Bentley
