Dear Doctor:

Under separate cover we have forwarded specimens of blood and urine for our employee, [REDACTED], 54 years old, who has been working with lead for the past fifteen years. He has been working in our Smelting Department for the past seven years. At the present time he has a cold.

[REDACTED] has an ashen gray pallor, lead line on his gums and general weakness. His last stipple count was 29 and his hemoglobin was 76. In the past two months he has lost five pounds.

Kindly favor us with your report in signed triplicate together with a single bill.

Very truly yours,

F. B. Lanahan
