

from Otto
1982

1982

VC Study (KU)

- ① From Otto : 1181 people
4 were dupes
 1177

Created new variable "WONGTYPE"

A = Active as of 72

I = Inactive as of 72

D = Dead as of 72

? = Duplicate record, entered as both active and inactive.

- ② Read in Pauley's data.

- ③ Matched Wong data with A, B from NIOSH and Work history, and ~~Don~~ Pauley (B)

Found -80. with no "A." data ^{from CW, SSN}

21 missing B data
59 B's but no A's

??

Suggest getting NAMES, BIRTHDAY & matching...

- ④ Formed B record file ^{wh.}

Use data from active, if present

Else from Pauley.

Else from NIOSH.

- ⑤ Count of actives = 279

(came from Work history & Last Term record)
 (many were 'I' from Wong)
