Commercial and Industrial Use of Asbestos Fibers; Extension of Comment Period and Announcement of Additional Control Option

AGENCY: Office of Pesticides and Toxic Substances, Environmental Protection Agency (EPA, or the Agency).

ACTION: Extension of Comment Period for Advance Notice of Proposed Rulemaking (ANPRM) and Announcement of Additional Control Option.

SUMMARY: EPA extends the comment period on the Commercial and Industrial Use of Asbestos Fiber ANPRM to February 15, 1980. The extension is granted to accommodate industry requests and to provide additional time to comment on the ANPRM. The Agency also announces an additional control option under consideration.

DATE: All comments should be received by the Record Clerk by February 15, 1980.

ADDRESS: All comments should be sent to Mrs. Joni T. Repasch, Record Clerk, Office of Pesticides and Toxic Substances (TS-783), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460.

Comments should include the docket number OPTS-61005A. Comments received on this Notice will be available for reviewing and copying from 9:00 a.m. to 4:30 p.m., Monday through Friday, excluding holidays, in Room 447 East Tower, EPA Headquarters, 401 M Street, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Industry Assistance Office, Office of

Pesticides and Toxic Substances (TS-783), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460. Phone: 800-424-9065 (In Washington, D.C., call 544-1404).

SUPPLEMENTARY INFORMATION: On October 17, 1979 (44 FR 60061), EPA issued an ANPRM on the Commercial and Industrial Use of Asbestos Fibers. The comment period expires December 17, 1979. EPA has received requests from the Asbestos Information Association/North America, Johns-Manville Corporation, Armstrong Cork Company, the American Paper Institute, Inc., the National Electrical Manufacturers Association, the Resilient Floor Covering Institute, and the Asbestos Cement Pipe Producers Association for extension of the comment period on the asbestos use ANPRM. The extension requests range from 30 to 120 days. Industry representatives are seeking these extensions because they believe that the information requested by EPA is complex, extensive, and not readily available.

EPA has developed an additional regulatory control option since publication of the ANPRM. The comment period deadline has been extended to February 15, 1980, to provide more time for industry to produce the information requested and also to allow for public review of the additional regulatory control option. Submission of information during the ANPRM comment period will insure that the Agency will consider that information in proposing the asbestos regulation. In proposing a rule, however, EPA will consider all relevant information to the extent possible, even if that information is submitted after the close of the comment period.

Should EPA's evaluation of human health risks and economic impacts determine that all but essential uses of asbestos present unreasonable risk, a possible regulatory strategy may be to ban the manufacture, processing, distribution in commerce, and import of asbestos for all nonessential asbestos uses at some fixed date in the future. EPA is seeking comment on this overall regulatory approach and on an appropriate date for instituting a general use ban. Effective dates presently under evaluation range from 1985 to 1995.

EPA anticipates providing an opportunity for essential use exemptions should a total asbestos ban be instituted. The exemption criteria may be based on factors such as established benefits, limited public health risks, commercial availability of substitutes, and significant economic impact if the use is banned.
