DOCUMENT DESCRIPTION: Memo

FOSTER WHEELER CORPORATION
LIVINGSTON, N. J.

INTER OFFICE CORRESPONDENCE

Job No. 2-79-2015

March 5, 1966

Hand up

TO: MR. H. F. SMITH - NEW YORK SALES

COPIES: Messrs. J. P. Winkin - Director of Engineering
E. C. Koch - Contract Control
R. W. Nichols - Contract Control

SUBJECT: PUBLIC SERVICE ELECTRIC & GAS COMPANY
HUDSON GENERATING STATION - UNIT NO. 2
FWO CONTRACT NO. 2-79-2015

Confirming my conversation with you this morning, please advise the customer of the following:

Due to the development of new insulating materials in the industry, Foster Wheeler is recommending modifications to the Public Service Specifications in the use of glass blanket insulation in a number of areas. *Where?*

In accordance with our recommendation, the apparent advantages are, a shorter time of erection of the materials as well as a savings of dollars. *win in*
We have now prepared Specifications involving the use of the glass blanket materials. In addition, we are also recommending the use of spray, rock or lead slag blanket and calcium silicate in specific areas as the best overall job.

The above recommendations are based on the best possible insulation job as we know it.

If you concur with our recommendations on materials, we are prepared to credit this contract with:

THIRTY SEVEN THOUSAND DOLLARS (\$37,000)

D&S, with no other changes to the contract. ?

Please let us have your answer as soon as possible.
