10/3/72

By Thursday

Bob Heiden

As we discussed last week. Will you please see that two things are done related to the flow recorder at the Dept 246 sewer

1. Changes are made per your project to make sampling proportional to flow.

What is project No. 3-3979-910

When will required parts be available
10-20-72

2. Equip flow recorder with a pen that doesn't have to be inked on daily or shift basis. Will do when project is done
