Mr. P. T. Saverstrom - Toledo 23
Mr. R. F. Shannon - Granville
Mr. D. C. Glosser - Toledo 23
Mr. P. Scheuerle - Berlin
Mr. F. C. Wilson - Granville 30

Based on test results obtained to date in TR-39245, 39081, 38166, 38874, 39465, 38915, and 38735 the OCF product is equal to or better than the competitive products. Approval is given to test market the asbestos free Kaylo, recognizing the fact that due to the wood fiber content, it is not as good as standard Kaylo in high temperature performance.

The Time-Temperature-Wood Fiber degradation relationship is unknown and a study should be undertaken to investigate it. This would be a long term project (6 months to a year).
