

Interoffice Communication

To R. D. Gamblin
From J. A. DeBernardi
Date November 10, 1980
Subject VCM RCRA Permit Application

After a thorough review of the RCRA regulations and the wastes generated at the VCM Plant it has been determined that the VCM Plant is required to submit a RCRA permit application. The plant qualifies as a generator and treater of hazardous waste.

The information in the permit application is true, accurate and complete to the best of my knowledge. All other plant waste materials or treatment systems have been considered and determined to be exempt from RCRA.

J. A. DeBernardi
