**NEW DIRECTORY LISTS COMPANIES
MANUFACTURING PRODUCTS FROM RECYCLED VINYL**

WAYNE, New Jersey, January 18, 1993 — A directory of companies manufacturing products from recycled vinyl (polyvinyl chloride, or PVC) plastic is now available from the Vinyl Institute, the national trade association representing the leading manufacturers of vinyl, vinyl feedstocks and additives, and film and sheet products.

The Directory of Companies Manufacturing Products From Recycled Vinyl provides the name, address, phone and fax numbers, and key contact(s) at 47 companies. It also includes a brief description of the product offered, its percentage of recycled content and its proportion of post-industrial, pre-consumer and post-consumer content. For quick reference, the directory lists companies alphabetically and also cross-references by product categories.

"This directory has been developed to help procurement officers and purchasing agents buy products made of recycled materials — a critical step in the process of closing the recycling loop," said Robert H. Burnett, executive director of the Vinyl Institute.

For a free copy of the directory, call the Vinyl Environmental Resource Center at 1-800-969-VINYL (8469), or write the Resource Center, One Cascade Plaza, 19th Floor, Akron, OH 44308.
