REFERENCE: WORKS ENGINEERING OCCUPATIONAL HEALTH PROGRAM

In the attempt to obtain or develop training programs on plant chemicals designated as potential carcinogens or embryotoxins, the following information is needed. Please notify the writer of any programs in existence or under development for the following chemicals.

<u>Chemical</u>	<u>Main Area of Use</u>
Acrylonitrile	ACRN
Asbestos	plantwide
Benzene	Aniline
Carbon tetrachloride	Hypalon
Chloroform	Hypalon
Ethylene dibromide	TEL
Ethylene dichloride	TEL
Hydrazine	Meth, Ammonia
Lead and its compounds	TEL
Perchloroethylenc	Hypalon
Zinc chromates	plantwide

If no reply is received by January 12, 1981, individual contacts will be made.
