AMPE - VC SAFETY ASSOCIATION LINKS

Many of the APME members including ICI are members of the International group the VCSA thus I would like to propose that we create a link between the APME "safety" sub committee and the VCSA.

Having received a "feed back" from Edwin Robson who attended your 6/7 May meeting I believe that some of the safety issues raised there would be of benefit to the VCSA members. I would propose that one of the attendees at the APME group does a summary presentation of the APME group meeting to the VCSA and also reports to the APME the VCSA proceedings. Since I am the program chairman for the VCSA this year I could easily include in the September meeting an item from the APME. If you approve would you let me know as soon as possible. H Deuschl from Wachter, O Ass from Norsk Hydro and R Bonny from Solvay are past attendees of the VCSA who I could approach to do the presentation if the APME approve.
