

ETHYL CORPORATION OF CANADA LIMITED

Memorandum of
Meeting with Occupational Health Division of Health Branch
Department of Health Services and Hospital Insurance
Victoria, B.C.

Subject: HIGHER TETRAETHYL LEAD CONTENT IN MOTOR FUEL

The meeting was held on Thursday, January 14, 1960, at 10:00 A.M. at the Occupational Health offices. Present were Dr. John L.M. Whitbread, Director, Occupational Health, Mr. Reginald Bowering, Director, Public Health Engineering, Mr. A.C. Tully and Dr. D.R. Warren.

We received a pleasant reception by Dr. Whitbread who had obviously perused U.S. Public Health Service Bulletin #712 - "Public Health Aspects of Increasing Tetraethyl Lead in Motor Fuel". Along with Mr. Bowering, he is charged with the occupational health and industrial hygiene aspects of the Health Branch.

Mr. Tully outlined the purpose of our visit, the economic justification and the corporation's desire to maintain a high standard of industrial hygiene in the distribution of Ethyl fluid.

Dr. Whitbread and Mr. Bowering expressed opinions that there was no health concern in their minds arising from the proposal. Dr. Whitbread asked if any action was desired on his part, such as formal approval. He was told by Mr. Tully that no statement was desired at this time as our visit was purely informative.
