

NEG. NO. 1-8

TRADEMARK FILE INFORMATION

Trademark:	Tuff-Link
Trademark Owner:	Johns-Manville Corporation
Last Assignee:	J-M A/C Pipe Corporation
Date of First Use in Commerce:	June 9, 1978
Registration No.:	1,123,719
Date Trademark Registered:	August 7, 1979
Size of Label in Trademark File:	N/A

Receipt of Pictured Label by Patent Office: N/A

Introducing the Tuff-Link coupling.

Lightweight, damage resistant FRP construction. The Tuff-Link coupling is made of a lightweight, damage resistant FRP construction. This makes it easy to handle and install, and it resists corrosion inside and out.

Integral rubber sleeve. The Tuff-Link coupling has an integral rubber sleeve that fits snugly over the pipe, creating a tight seal. This sleeve is made of a special rubber compound that resists corrosion and is designed to last for many years.

Slim profile. The slim profile of the Tuff-Link coupling means less weight and less space required for installation. This makes it ideal for use in tight spaces and for long-distance transport.

Resists corrosion inside and out. The Tuff-Link coupling is made of a special FRP construction that resists corrosion both inside and out. This makes it ideal for use in harsh environments and for long-term service.

It makes the Transite pipe system even better.

The Tuff-Link coupling is the perfect addition to the Transite pipe system. It provides a secure, leak-proof connection between pipe sections, making the entire system stronger and more reliable. The coupling is easy to install and maintain, and it resists corrosion and damage from external forces. This makes it the ideal choice for any pipe system that requires a durable, long-lasting connection.

Lightweight, damage resistant FRP construction. The Tuff-Link coupling is made of a lightweight, damage resistant FRP construction. This makes it easy to handle and install, and it resists corrosion inside and out.

Corrosion resistant. The Tuff-Link coupling is made of a special FRP construction that resists corrosion both inside and out. This makes it ideal for use in harsh environments and for long-term service.
