FIVE

Attached are the VCM personnel monitoring exposure values for Flemington and Burlington by job classification, through the weeks of 9/2/74 (Flemington) and 8/19/74 (Burlington).

The reporting format has been changed slightly in the interest of clarity. No data will be reported for any given week unless the analytical results are complete. This will result in a one-week lag for reporting of the Flemington data and a two-to-three-week lag for the Burlington data.
