Subsequent to my memo dated June 5, 1972, attached is a further memo from Wink Corey dated June 14 which is self-explanatory.

At a meeting on June 14, implementation of Therminol 77 phase out was initiated. Our official reason to customers for discontinuing this product is that it was made from a by-product which is no longer available to us.

Would C. Paton and his people work with Earl Potter on reviewing specifically the list of identified products referred to in the last paragraph of page #1 in Corey's memo.

Let's all review our own goals and objectives in this regard and cooperate fully with Bill Papageorge on the final count down!

H. S. BERGEN
