DOCUMENT DESCRIPTION: 1934 Letter regarding Plant Visit by by Dr. Elkins.

November 9, 1934.

Truhite
File 1430

Nov. 27

Dr. Bradley Dewey, President,
Dewey and Almy Chemical Company,
Cambridge, Massachusetts.

Dear Bradley:

Thank you for your cordial reply to my letter of October 31st. As you suggest, Dr. Elkins will get in touch with Mr. Egan as to a time convenient for his visit to your plant. As he has quite a bit ahead of him, this may not be for a couple of weeks.

I will admit that my letter was a trifle long, but it was not as "burdensome" as it may have appeared. I am sending Dr. Elkins to quite a number and variety of plants and, since some employers are a bit less liberal in such matters than our good friends the Dewey and Almy Chemical Company, it seemed best to compose a letter telling pretty much the whole story. This letter, with minor variations, has been or will be sent to the Dewey and Almy Chemical Company, General Electric Company, General Bridge Rubber Company, Graton and Knight Company, Stetson Shoe Company, Norton Company, Waukena Manufacturing Company, Uxbridge Horsted Company, Hampton Company, Bird and Son, Lever Brothers Company, DuPont Viscoid Company, Harriman Technical Company, Harriman Hat Company, Cities Service & Mining Company and the American Optical Company. I think you will agree that I am doing my best to give Dr. Elkins a liberal, even though somewhat compressed, industrial chemical education.

Sincerely yours,

Manfred Borswath
Director
Division of Occupational Hygiene
