F. H. MacDonald

Gentlemen:

Please note the attached form letter from Monsanto. As far as I can determine, we are not using the PCB disposal service that Monsanto offers and, as a consequence, the remarks are only of general interest. However, I draw your attention to the comments about the disposal of solid waste. This has been a continuing problem and will only get worse as time goes on. Everyone has the same problem in this regard, even though that may be only a minor comfort.

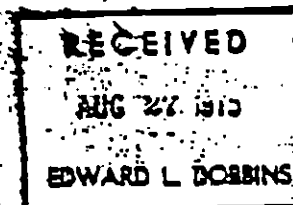

I am not sure about the ASBD use of the Monsanto disposal facilities for PCB's. I have forwarded a copy to Ed Feuerstein for his use in ASBD.

Very truly yours,

R. C.
